

# A great snapshot

---

John Thomson • Tom Johnson

This is your abstract. It should give a brief overview of your snapshot, if possible without using formulas.

## 1 A heading

Your actual snapshot. And here are some references as well: [knuth1977fast] ends up in the “Further Reading” section since its `biblatex` entry contains `keywords = {furtherreading}`, while [knuth1986texbook] ends up in the standard references.

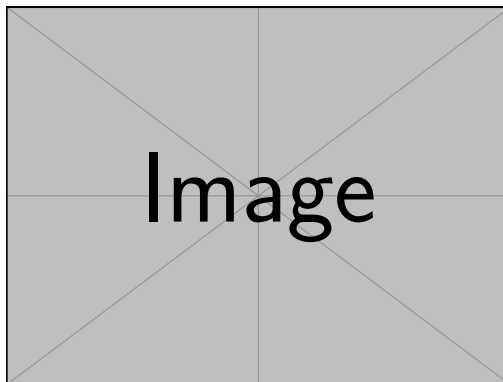

Figure 1: An image.

*Snapshots of modern mathematics from Oberwolfach* is a mathematics communication project of the Mathematisches Forschungsinstitut Oberwolfach (MFO) and IMAGINARY – open mathematics. It is a part of the project Oberwolfach meets IMAGINARY funded by the Klaus Tschira Foundation and the Oberwolfach Foundation. The snapshots are written by participants of the scientific program of the institute. They are reviewed by the organizers of the scientific program and edited by a team of editors. All snapshots can be found on [www.imaginary.org](http://www.imaginary.org).
